

Facilities Technical Specialist

Ottawa, Ontario
Job Reference #: IRC381

Experience Canada's North – a unique part of the country few get to see!

Nasittuq provides exemplary technical services in the operation and maintenance of Canada's North Warning System (NWS) Project. Our highly skilled workforce provides engineering and project management expertise to our customer, the Department of National Defence (DND). For more information, visit www.nasittuq.com.

Reporting to the Supervisor of Project Implementation, the successful candidate will be responsible for managing the implementation of upgrade and construction projects for various mechanical systems, including: HVAC, domestic and waste water, power generation, and bulk fuel storage and handling systems.

Responsibilities:

- Define project objectives, which involves:
 - Developing RFP and RFQ's for project material and work
 - Evaluating vendor and subcontractor responses/submissions and make appropriate recommendations
 - Developing project costing proposals
- Coordinate resources to complete the project work
- Ensure that project objectives are being met by monitoring and measuring progress, which involves:
 - Providing project status updates to Management and Customer, as required
 - Liaising with Subcontractor Management and/or Project Site Force to ensure quality, cost and scheduled completion of work
- Coordinate for project acceptance/approval

This position will require occasional travel to the Arctic (average of 2 to 3 weeks per year) to perform inspections at the NWS northern sites.

Qualifications:

- Mechanical Engineering Technology Diploma or Bachelors Degree in Engineering
- Minimum 3 years' related work experience in a commercial/industrial project management environment
- Working knowledge of regulations, codes and specifications, including but not limited to: the National Building Code, National Fire Code, Canadian Electrical Code, National Masters Specification, Canadian Environmental Protection Act, API codes, and Project Management Body of Knowledge
- Strong MS Office (Word, Excel and Project), analytical, communication and report writing skills
- Self-motivated and highly organized to track and manage multiple projects
- Professional demeanor/compartment due to many dealings with internal and external customers
- Project coordination or work experience within remote/isolated northern/Aboriginal communities considered an asset
- The incumbent must have a valid driver's license, be eligible for **SECRET** security clearance, and pass a company pre-employment medical

We offer a competitive salary and comprehensive benefits that also includes pension plan, professional development and a flexible work/life balance environment. Salary will be commensurate with experience.

Qualified and interested candidates please forward resumes specifying the job reference number above by [13 FEBRUARY 2012](#) to:
